- increasing sales
- increasing accounts receivable
- decreasing accounts receivable
- decreasing sales

Challenge

Your answer is correct.
Cardinal Company issues new common stock for $50,000. This transaction is considered a(n) **financing** activity on the statement of cash flows.
When calculating net cash flows from operating activities, the change in accounts payable is subtracted from net income when accounts payable ______ during the period.

Your answer is correct.

increases

decreases
Which section of the statement of cash flows shows the cash paid for fixed asset purchases?

- Financing activities
- Operating activities
- Investing activities
- Cash activities

Your answer is correct.
Given the following, calculate cash provided by operating activities:

<table>
<thead>
<tr>
<th>Description</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Net income</td>
<td>$20,000</td>
</tr>
<tr>
<td>Depreciation expense</td>
<td>$50,000</td>
</tr>
<tr>
<td>Accounts receivable increase</td>
<td>$10,000</td>
</tr>
<tr>
<td>Prepaid expense decrease</td>
<td>$6,000</td>
</tr>
</tbody>
</table>

Your answer is correct.

$66,000
When preparing the statement of cash flows using the indirect method, a(n) _____ on the sale of an investment asset is added back to net income.

Your answer is correct.

- loss
- gain

OK
Jay Corporation began the year with a $153,000 balance in the accumulated depreciation account. The ending balance was $197,000. During the year a piece of equipment with $15,000 in accumulated depreciation was sold. Therefore, the depreciation adjustment that Jay needs to add to net income is $59,000.

Your answer is correct.

$197,000 - $153,000 + $15,000 = $59,000
Depreciation and amortization expense are added to net income when preparing the operating activities using the indirect method.
